

The do not call list is giving us piece of mind. I do not have to watch caller ID, nor do I get calls on my cell, that cost me money. We need stronger consumer protection laws, protecting citizens from not only unwanted calls, but calls that are a segway into scams. Many of our senior citizens and developmentally disabled are unable to protect themselves from these calls. I am also sure you don't want these un-solicited calls either. This protects all of us that want protection

Thank You

Katharina and Robby
